Quality Teaching

Due to the necessity of increasing the real process of practices with high technology equipment in the telecommunications area, our institution was accepted as a Local Academy in the beginning of 2001. Immediately we look for the certification of three instructors as a support for the program.

By the middle of 2001 the process of certification began for students from the Cisco Networking Academy Program for the Computer Systems Students, which was totally accepted by the students of this career. Since then, a great process of quality teaching began for the students, which receive it as part of their regular program at the University level. As time goes by, more students have been incorporated to the program.

On April 2002 we successfully opened the first semester of the Cisco Academy for Masters Degree students in the technology area, with 106 registrated students in 4 groups. At the moment the first semester is imparting for two students from the area of systems, networking and telecommunications degree and masters degree.

We have join efforts to habilitate the labs and the training of students with the support of the authorities, mainly from our Principal Lic. Vicente Climent Lopez who makes a great emphasis in teaching with quality through the technology resources. It is important to

mention that all the people that are part of the Studies Center are conscious and satisfied with the technology that a supplier as Cisco offers and most of all, with the quality backup and dependability. Day by day we face service integration challenges, establishment of new and better connections, quality insurance in applications and services, which is achieved with a reliable team, with world experience.

Thanks to the Cisco Networking Academy Program Mexico our Institution offers the knowledge to all the graduates from our university, giving to the work field the quality of teaching that the companies challenges requires and we are sure that we offer the knowledge of quality that the field needs from our graduates.

Help On-Line...

Get in touch with us from

7am to 5:30pm PST.
(Pacific Standard Time)

It is very important for me to make emphasis that from all the institutions that teaches the certification to students agree that it generates a high recognition using the program, so it is very important to offer an excellent equipment service in the labs as well as all the tools that the students need in order to have success in their semesters.

Cisco Networking Academy is the beginning of a great high quality training era in the technology field. A world wide certification is something that now a day is beginning to give and demand in all the countries, thanks to Cisco Mexico impels this as an opportunity to all the Universities.

OUR COMMUNITY

Selene Macias, Student

Universidad de Norteamérica (Centro de Estudios Lomas)

My name is Selene Macias Arredondo, I am studding the seventh semester of Informatics Administration career at the Norteamerica University, which belongs to the Centro de Estudios Lomas. Now I am studying the second year (third module) of the Cisco Networking Academy, thanks to my school that is a Local Academy which gives the courses to get the a world recognition certification CCNA.

It has been very important for me to be part of the program, thanks to the program I'm doing my internship at the Mexico's Networking Academy team, which is a privilege because many students apply to the position and the opportunity was given to me. Since I was studying high school at CEL I always wanted to work in the networking and systems field, but I never imagine being part of an International known company.

Been able to work for Cisco Networking Academy has allow me to realise the importance that the program has in the IT and networking field, not just in Mexico but worldwide, and how the program has help so many people for its

personal and professional development and for the productivity of so many companies.

Cisco Systems makes a great educational effort so the students around the world can have access to the necessary knowledge to learn how to design, maintain and configure networks, which allow us have more working opportunities due to excellent professional level that the Cisco Networking Academy gives to all its students, through the e-learning technology, which independently the place we are, let us have access to the curricula, present on-line exams and receive technical support, any time, which assures the quality of the program.

It is very important to mention that my school is one of the Academies that granted 100 scholarships from Cisco Learning Institute, to support gender equity, project in which I'm also part of, allowing 75 female students and 25 male students an Economic support for their studies. So I am very grateful, on behalf of my institution, this opportunity that has been given to us, I am honor to be one of the students who granted a scholarship.

Thanks to the support given by CLI (Cisco Learning Institute) and Cisco Networking Academy Mexico, the didactics of the program has spread to all the area of studies at my school. Not just Programming and Informatics students can reach the program, now students from other specialties are now studying the program, such as Administration, Communication, Translation, Gastronomy and Tourism.

It only rest me to tell you that for me it has meant benefits, because I have professionally overcome myself, I'm having the opportunity to receive the experience and training from the field experts, so after so much help, I'm committed to get my certification as soon as possible and demonstrate that we can make it and we are a very important part of the IT Age.

Cisco receives World Communication Award 2002 thanks to its stable networks

Cisco Systems saved \$1.700 millions dollars globally on the 2001 fiscal year due to the use of data base stable network to increase the application briefcase based on Internet business. As recognition to this success, Cisco has recently received the World Communications Award for its "Best used on a stable network". Presented on London last month, the award recognizes the proven low cost and the productivity benefits that Cisco has given

thru the implementation of the IP services integrated voice and data.

Gender Initiative in Mexico

Last October 25th, I had the chance to participate on the panel "Woman main character of the change" as part of the 55 Anniversary of the Autonoma de Nuevo Leon University, as a result of a kind invitation from Leopoldo Villarreal, main contact of this Local Academy.

For the Project Coordinator of the **Gender Initiative of Cisco Learning Institute** in Mexico, this kind of events represents an exchange of experiences, challenges and perspectives among professional women, most of all, the enrichment value that it means for the **Gender Initiative**.

It is important to mention that this event acquires bigger transcendence when it is shared with professional women that also are wives, mothers, and partners. In a word, modern women that are growing to the rhythm that demands the society, giving as a result, the promotion and evolution of initiatives like ours, whose benefits will be reflected in the students from the Cisco Networking Academy Program.

ALLIANCES

SUN

Next November 15th, 2002 the Sun AASEC Academic Agreement in an event will be sign with the Occident University and its Locals in Culiacan, Sinaloa. This will be our second Regional Academy. We also would like to inform you that we have begin with the training of the Java programming and Solaris Fundamentals with professors from Occident University, Autonoma de Guadalajara University, Tec Edo de Mexico and Autonoma de Morelos University. We hope that these professors get their certification and will soon be imparting this knowledge to the students from these Universities.

All the Universities above mention are AASEC potential universities, which we will be signing the agreement at the end of this year or starting next year. Also with the Veracruzana University, with LANIA and with Tecnológico de Monterrey Campus Monterrey.

We hope to keep on sharing our academic advances with all the Universities enroll in the Cisco Program and keep on adding more and more universities to our academic model Sun ASSEC.

For more information you can access our website: www.sun.com.mx/service/educacion

VUE

"To others could make me human, I have to make them humans; if for me all are as things or beasts, I won't be better than a thing or a beast neither".

Fernando Savater

At Padhia we offer Human Integral Develop programs, academic improvement, pedagogic educational actualization, as well as integration for cutting edge technological education.

For more information: <http://www.padhia.com.mx/cnap/index.htm>

PADHIA

PEARSONED

Once more the CNAP "Guide for the first year" has been sold out in the national territory and Central America, a month ago the material that was send finished in few days, we already asked for another order, bust since the order has to be made to Spain, the arrival takes time, but we are sure that soon it will arrive, and we will be informing you. On the other hand we know the problematic for many of you to get Cisco books, because that not all the libraries have them, so Pearson Education has made negotiations for some sale points and we got that Casa del Libro will sell the Cisco Press material in 9 of their branches in the D.F, so this material will be more accessible and with the advantage that they will keep on giving the 15% off to all the students from the Cisco Academy.

In order to get this discount it is necessary to present a University ID as students from the Academy.

We hope that soon we can count with more libraries at the interior of the Republic so you can have more access to the Cisco Press material.

This month's news:

Cisco Secure Firewalls PIX

David W. Chapman Jr / Andy Fox

One of the main components of the secure normatively of any of the organizations or companies is the firewalls implementation and maintenance. Based on the official course (CSPFA, Cisco Secure PIX Firewall Advanced) this book will instruct about the necessary knowledge to describe configure, check and administer the family products

of the Firewall PIX and the group of benefits of the Cisco IOS firewall.

If you are now studding to get the Cisco Security Specialist 1 certification or you simply want to learn and use efficiently the PIX firewalls, this book will give you a complete solution for planning, implementation and administration of the secure firewalls PIX networks.

CATC SUPPORT

Academy Connection... The next reality...

A new challenge is about to start. The most important administration and follower platform of the classes of the Cisco Program is about to begin the most outstanding stage since it's planning: The Regional and Local Academies implementation and training, also for Instructors and Students.

New functions have been added to this collaboration site as well as an environment that will allow an easiest way to handle the administration of the Classes. In addition, a great team of researchers, professors and technicians have been working hard to analyze the different needs that the Academies in Mexico and in the World in order to maintain the Quality Courses and our students continue with the same motivation and overcome to be part of the modern Mexico that demands upgrade, perseverance and knowledge.

Communication is a very important part to this transition to have success, that's why all the Mexican Netacad team is committed to take this program to the highest quality level, and also be spread to all the Universities in the country, so the feedback from students and main contacts is very important. This way, all the students from Mexico of the Superior level will handle electronic information as part of their daily duty and will integrate new study habits that will increase their professional education.

Regards...

Huerta, Everardo M.C. CCAI.
